

WHY BRT?

Bioregulation Therapy (BRT) is a unique, proven and highly effective modality that uses advanced, low-intensity pulsed electromagnetic field (PEMF) technology to improve biological communications at the cellular level. Cellular communication is critical to supporting the body's adaptation and self-regulation processes, which in turn, help to accelerate healing, strengthen the body and restore wellness.

BRT can be used on its own, or in conjunction with other types of alternative and conventional therapies.

"A consistently high level of performance is a must for good results. I use the LENYO BRT devices regularly during preparation and recovery phases to help with both physical and mental conditioning including coordination, blood circulation and oxygenation, concentration, muscle function and reaction time."

— Dr. Elvira Babindák
Medical Director, Hungarian Taekwondo Federation

BRT SUCCESS

"During competitions it is important to prepare quickly and to treat injuries immediately. We use the LENYO BRT devices before and after trainings and competitions."

Erika Huszár – Olympic speed skater

"I use the LENYO devices for daily preparation – both physical and mental. After an almost 9-hour Ironman competition, the first thing I do is lie down on a LENYO pad."

Erika Csomor – long-distance runner, duathlon, triathlon and Ironman champion

"BRT is part of my life. Since I first tried it and experienced its positive effect, I have never gone even a week without using the BRT devices."

Tamás Varga – world champion and two-time Olympic gold medalist

BIOREGULATION THERAPY

A new and innovative approach for helping with preparation, performance and recovery

TECHNOLOGY

Every organ in the body has its own bioelectromagnetic field, and every single cell in the body communicates via electromagnetic signals at the

overall rate of trillions of chemical reactions per second, In order to maintain optimum metabolic activities and sustain good health, this cellular communication process needs to be precise and synchronized to effectively manage these instantaneous exchanges of information.

Unfortunately, there are a number of internal and external sources that can contribute to the breakdown of this critical communication process. These sources include environmental and chemical toxins, nutritional deficiencies, emotional stressors, microbes and electrosmog – adverse electromagnetic fields emanating from high-power electrical lines, microwaves, computers, cell phones and other common electronic devices.

When inner communications are disrupted, the body's cells, tissues and organs are compromised and a variety of disruptive symptoms can develop, including chronic imbalances and hypersensitivities to biological and environmental triggers.

During a BRT session, low-intensity electromagnetic signals are sent to targeted communication channels in the body. These BRT signals help to bridge inner communication paths and reestablish natural adaptation and regulation activities. Clinical experience shows that BRT can help to dissipate sensitivity reactions and accelerate natural healing.

BENEFITS

BRT is a safe, non-invasive and highly effective modality for supporting both the physical and mental aspects of a strenuous fitness program, competition or other physically demanding activity. It can be used by individuals, by facilities or by organizations to address all levels of physical activity, as well as preventatively for overall fitness and wellness.

Applications

- Helps with preparation, performance and recovery
- Aids in circulation and blood oxygen level
- Helps to lessen pain and accelerate healing
- Increases relaxation and sleep quality
- Helps with joint and muscle recovery
- Improves concentration, focus and mental endurance
- Strengthens the immune system
- Detoxifies the body
- Improves digestion and the availability of nutrients to the cells from the bloodstream
- Supports cellular regeneration
- Ideal for both professional and amateur athletes

DEVICES

Designed for ease of use and efficiency, LENYO BRT devices can be used in the home, on the field or in a clinical environment.

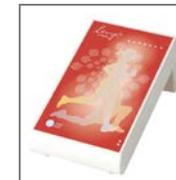

LENYO SPORT

The LENYO Sport is ideal for athletes needing ongoing support for long-term fitness and sports programs. It has 12 automated BRT programs and can be used by two athletes at the same time. • Call for pricing

LENYO LUX PRO

The LENYO Lux Pro has 136 BRT programs, offers the ability to customize protocols and can be used for overnight sessions. • \$5,800

LENYO FITNESS

The LENYO Fitness offers two customized BRT programs that can help with preparation, performance and recovery before, between and after activities or competitions. • \$1,495 (L-Set)

LENYO MOBILE SPORT

The LENYO Mobile Sport is a lightweight, pocket-size device that has 14 BRT programs and comes with a small therapy pad or belt. It can be used alone or between other BRT sessions, and with an optional adaptor, can be connected to any size therapy pad. • \$850 (S-Set)
