

ADDICTION AND RECOVERY

Bioregulation Therapy

Recovery and transformation through the power of advanced technology

What is BRT

Bioregulation Therapy (BRT) is a unique energy and communication modality that uses advanced biofeedback and pulsed electromagnetic field (PEMF) technology to support biological communications at the cellular level – ultimately helping the body to better self-regulate, heal and restore natural balance.

How BRT can help with addiction and recovery

Cellular communication is critical to the body's adaptation and regulation processes which help to maintain overall health and deal with the symptoms and causes of cell deterioration and disease – including drug and alcohol abuse.

Every organ in the body has its own bioelectromagnetic field, and every single cell in the body communicates via electromagnetic signals, or fields, at the overall rate of trillions of chemical reactions per second. In order to maintain both emotional and physical health - all of the body's organs, tissues and subsystems require extremely precise communications to effectively process these instantaneous exchanges. When these critical communications exchanges are disrupted, the body's cells, tissues and organs are compromised and unhealthy symptoms follow.

The effects of alcohol and drug addiction contribute greatly to the breakdown of the body's inner communication processes. Symptoms of addiction can manifest in a number of physiological and emotional issues, including damage to organs and tissues, damage to the central nervous system, cognitive disorders, depression, anxiety, stress and sleep disorders. BRT can help deal with these issues by restoring efficient biological communications and triggering the natural self-regulation process, which in turn, can address some of the key aspects surrounding addiction.

- Nutritional and energy deficiencies
- Psychological blocks and emotional attachments
- Electromagnetic signature of specific drugs
- Compensatory chemical reactions

During BRT sessions, BRT devices safely deliver extremely low intensity electromagnetic signals at the cellular level. These BRT signals are sent to targeted communication channels in the body, and as these signals pass through the tissues, they help the cells to clear out blockages and restore healthy communication paths.

LENYOSYS™

in tune with nature™

Once biological communications are restored, the body can more efficiently process the electrical and chemical exchanges associated with those channels and deal with any imbalances or dysfunctions in those areas.

Benefits of using BRT for substance abuse and addiction

- Helps to diminish cravings and support detoxification
- Works to decrease various kinds of intoxications and inflammatory processes
- Improves digestion and the availability of nutrients to the bloodstream
- Helps to discharge negative energy and improve receptiveness to therapy and healing
- Helps diminish physiological responses to addictive substances
- Identifies substance-specific signatures in order to create homeopathic remedies
- Improves sleep, relaxes the muscles and decreases emotional anxiety

Benefits of offering BRT for a recovery center or practice

- Aids in long-term recovery and can help to reduce early discharges and chronic relapse patients
- Differentiates the center or practice as progressive and comprehensive
- Helps to increase success rates and generate new revenue streams
- Insurance reimbursable

Used alone, or as a complement to other conventional and alternative therapies, BRT can address the physical and emotional symptoms of addiction and support a natural path to recovery.

Versatile, user-friendly BRT devices

LENYO BRT devices are available in a variety of size and feature options – from professional multi-user systems to pocket-size, mobile devices that can be used in the home, at the office or on the-go. Designed for optimum efficiency, LENYO BRT devices are ideal for professional practitioners, recovery centers, large health and wellness facilities, spas, sports centers, rehab and physical therapy facilities, offices, schools and the general public. With the most comprehensive range of BRT product choices in the industry, LENYO BRT devices are non-invasive, easy to operate and safe for adults, seniors and children.

Learn more about BRT and the complete line of LENYO BRT devices at www.lenyosys.com.

ABOUT LENYOSYS. A leader in bioregulation technology and devices, Lenyosys is a division of Nestatek Inc., headquartered in Fort Lauderdale, FL. Lenyosys provides advanced bioregulation therapy (BRT) devices and solutions to professional practitioners in the medical, wellness, sports, enterprise, educational and veterinarian fields, as well as home-use products to the general public. A unique energy and communication approach to health and wellness, BRT combines advanced pulsed electromagnetic field signaling (PEMF) with the body's own biological communications to help restore natural regulation and healing activities. The LENYO line of BRT products includes office, home and mobile devices. For more information, visit www.lenyosys.com.

LENYO BRT devices have not been evaluated by The Food and Drug Administration (FDA). They are not meant to diagnose, treat, cure or prevent any disease. They do provide general benefits recognized for biofeedback and PEMF-based therapy devices. Individuals suffering from any disease or illness should consult with a physician or healthcare professional before using any BRT device.
