

CELLCOM

PROFESSIONAL USE

LENYO CellCom

An advanced BRT device that combines cellular feedback and homeopathy

LCC HIGHLIGHTS

- Endogenous, professional-use device
- Extremely wide frequency range
- High-precision, low intensity signaling
- More than 553 automated programs
- Easy-to-use software application
- Protocol customization capabilities
- Homeopathic imprint function to continue therapy between clinical sessions

KEY APPLICATIONS

- Allergy management
- Immune system support
- Hormonal system-related conditions
- Detox and addiction recovery
- Electrosmog and environmental stressors
- Anti-aging and skin applications
- Scar healing
- Aches and pains
- Physical and mental performance improvements
- Anti-fatigue
- Mood and behavioral disorders
- Surgical recovery

The most sophisticated device in the LENYO line of advanced Bioregulation Therapy (BRT) devices, the LENYO CellCom (LCC) is a professional-use device that detects, analyzes and selectively modulates the body's electromagnetic field – triggering the body's own self-regulation and natural healing process.

Advanced bioinformatics

The LCC uses advanced BRT technology to capture the body's own internally generated (endogenous) information. It then utilizes that endogenous information – along with frequency, intensity, precise signal modulation and custom program design – to provide the most personalized therapy possible.

With more than 553 automated BRT programs and subprograms, the LCC offers the industry's broadest applied frequency range at 1 Hz – 1 MHz, and unparalleled signal modulation with alterations every 1/100th of a second.

The LCC also provides a Homeopathic Imprinter (HI) function. The HI module can transfer homeopathic signals (complex vibrational patterns) to portable, homeopathic remedies and carriers such as magnetic polymers, aqueous tinctures, ointments, certain metal alloys, certain crystals, jewels and more. The HI capability allows the user to experience customized therapy between clinical sessions – either at home or on-the-go.

As part of the most advanced and comprehensive suite of BRT devices in the industry, the LENYO CellCom combines energy-focused BRT technology with the body's own innate communication processes to accelerate healing, maintain wellness and reestablish a natural state of wellbeing.

LENYOSYS™

in tune with nature™

SYSTEM INFORMATION	
Device name	LENYO CellCom
Safety class	II. BF Biofeedback Device
Frequency	1 Hz – 1 MHz (-3dB)
Maximum intensity	10 MicroTesla (0.1 Gauss) with the M size applicator
Number of programs	553 + 108
Number of users	1
Power supply	Battery operated; rechargeable battery unit (7.2V, 600mA)
Size	12" W x 11.4" L x 2.1" H (310 mm x 290 mm x 55 mm)
Operating temperature	41° F - 104° F (+5 C° - +40 C°)
Storage temperature	-4° F - 122° F (-20 C° - +50 C°)
Relative humidity	Max. 80
Manufacturer	Hippocampus-BRT Ltd.
Made in	European Union

Versatile, user-friendly BRT devices

LENYO BRT devices are available in a variety of size and feature options – from professional multi-user systems to pocket-size, mobile devices that can be used in the home, at the office or on the-go. Designed for optimum efficiency, LENYO BRT devices are ideal for professional practitioners, large health and wellness facilities, spas, sports centers, rehab and physical therapy facilities, offices, schools and the general public. With the most comprehensive range of BRT product choices in the industry – including both endogenous and exogenous options – LENYO BRT devices are non-invasive, easy to operate and safe for adults, seniors and children.

Learn more about BRT and the complete line of LENYO BRT devices at www.lenyosys.com.

ABOUT LENYOSYS. A leader in bioregulation technology and devices, Lenyosys is a division of Nestatek Inc., headquartered in Fort Lauderdale, FL. Lenyosys provides advanced bioregulation therapy (BRT) devices and solutions to professional practitioners in the medical, wellness, sports, enterprise, educational and veterinarian fields, as well as home-use products to the general public. A unique communication- and energy-focused approach to health and wellness, BRT combines advanced pulsed electromagnetic field signaling (PEMF) with the body's own biological communications to help restore natural regulation and healing activities. The LENYO line of BRT products includes office, home and mobile devices. For more information, visit www.lenyosys.com.

LENYO BRT devices have not been evaluated by The Food and Drug Administration (FDA). They are not meant to diagnose, treat, cure or prevent any disease. They do provide general benefits recognized for biofeedback and PEMF-based therapy devices. Individuals suffering from any disease or illness should consult with a physician or healthcare professional before using any BRT device.
